**** FEBRUARY CLINIC FOR COVID-19 VACCINATIONS ****

We want to thank all who have called to request an appointment for the COVID-19 vaccine. As you can imagine, the calls we've received this morning were many. As of this time the Mercer County Health Department has filled all appointments for the February clinics based on the 100 doses that we anticipate receiving each week. We are hopeful that the amount of vaccine we will receive will increase as we move forward, at which time we will adjust our clinics to get those vaccines to the community in as timely a fashion as possible. Due to the unknown of future vaccine supply at this point, we will not be creating a list for future vaccines, but will let the public know through our website, mchdil.com, our Facebook page and WRMJ of upcoming opportunities to be vaccinated. If you are due for a second dose and you received the first dose through MCHD, you can still call to schedule that second dose. Those are being allocated and planned for separately. We appreciate your patience as we move through this process as quickly and safely as we can.
